

TECHNICAL DATASHEET GTEC Resilient Tape RAFT50

Page 1 of 1

Description

A natural rubber tape, used with GTEC Acoustic flooring system, usually adhered to the top of floor joists to form a continuity break to reduce the passage of sound.

It can also be used under floor tracks and behind abutment studs, to improve acoustic performance of partition & lining systems.

Appearance

A black open cell sponge, natural rubber strip
50 mm wide x 6 mm thick, with self-adhesive tape to one side.
The white cover paper to the adhesive tape should be removed prior to installation.

Adhesive tape

Type – Solvent based acrylic
Carrier – Polypropylene
Adhesive coat weight – 50g ± 5g
Release paper – 120g Moisture stable

Compression deflection at 25% – 35 kPa
Compression set – 50% deflection at 70 °C

Accelerated Ageing – at 70 °C
% change in compression – ± 20 %
Service temperature range – 50 °C to 50 °C

Physical Properties

Width – 50 mm ±3 mm
Thickness – 6.35 mm ± 0.6 mm
Length – 12 m ± 100 mm
Mean density – 416 kg/m³

Packaging

Supplied individually wrapped coil, with 40 microns shrink wrap. Each pack contains a Siniat label.

Health & Safety

Please read the Resilient Tape Health and Safety Datasheet available on our website or from Technical Services.
